

## 5-Ply and 7-Ply Defaults

With the recent changes in the Mohawk standard offering of flush doors, we would like to take this opportunity to convey to you the basic defaults we have put in place for quotes and purchase orders.

- Projects listed as 7-ply doors will be priced and produced as Commercial 5-ply. If 7-ply doors are specifically required and Commercial 5-ply is not an approved substitution, please consult our factory for special pricing and lead-time.
- Projects that identify 5-ply with no reference to Mohawk's Commercial or Architectural Series, will be produced and priced as Architectural 5-ply.
- Green Series doors must be noted when environmental: FSC, LEED, SFI, No added Urea Formaldehyde... is required.

As we work through the remaining inventory of 3-ply skins (7-ply doors) stocking customers will continue to receive 7-ply doors (almost always Rotary Natural Birch) into Q3 of 2006.

Customers with any questions are urged to contact their nearest Mohawk associate for more details.
