Blocking No Longer Required on Mohawk's Architectural Series Particle Core 5-Ply Doors

Mohawk Architectural Series 5-ply particle core doors do not require blocking for surface mounted hardware. In accordance with WDMA TM-7 testing procedures, Mohawk's bonded PC-5 doors have successfully slammed more than 1,000,000 cycles without failure. Tests were conducted with surface mounted hardware (including closers).

This new approval eliminates the need for through-bolts.

A full lifetime warranty is offered on all Mohawk Architectural Series 5-ply Doors.

For further information, please consult your nearest Mohawk representative or our manufacturing facility at 570-473-3557.
