

New York City Freight Constraints and Shipping Policy

After extensive research and investigation, Mohawk is pleased to introduce a new freight policy and pricing chart for New York City. It is critically important at the estimating stage of an order that we confirm with the customer the EXACT street address for NYC jobsite deliveries. When this information is supplied, please consult with Mike Matrey or Steve Dawson to be certain which freight schedule applies. Attached is a color coded visual map identifying the “targeted zones”.

Effective immediately, the following will apply for deliveries made by Northumberland:

Green Zone: Essentially 4 of 5 NYC boroughs excluding Manhattan – Standard freight cost shown in our price book.

Yellow Zone: Manhattan north of 34th Street - Will be serviced with Mohawk equipment but be advised that there are only certain times of the day that we can operate our factory trucks, and caution should be taken before we guarantee specific times of delivery. Freight costs for this region will be an additional \$200.00 to the various price book freight schedule for New York.

Red Zone: Lower Manhattan (below 34th Street) – NYC ordinances have limitations placed on the overall size of equipment that can be brought into this region. We have entered into an agreement with a local carrier to deliver into this region for \$900.00 per load. The maximum quantity (based on 3/0 x 7/0 x 1 3/4”) is 180 doors. Please make sure we understand how many deliveries are required and the sizes of the doors being quoted. Please consult with our shipping department to ensure accuracy.

If you have any questions regarding this matter, please do not hesitate to contact your local Mohawk representative or the Northumberland, PA shipping department.
