Louvers in Bi-Pass and Bifold Doors

Effective immediately, Mohawk will be limiting our offering of installed louvers into Bi-Pass and Bifold Doors to FLUSH PROFILES ONLY. Installation of lipped molding in these products impedes their functionality, and may prevent them from working properly.

Flush louvers are available on all flush veneer, hardboard, and MDO products. Due to the deep embossing of our Rustic door, flush beads are NOT available in this series.

If you should have any questions, please do not hesitate to contact your Mohawk representative for more details.
